**HIGH PERFORMANCE CAREER**  
**HIGH PERFORMANCE CAREER**

Auto industry leaders report that automobiles will increasingly become "high tech." On-board vehicle computers are controlling many engine functions—even diagnosing their own faults. The auto-making industry is experiencing an incredible growth in technology. At the same time, the repair industry is suffering from a severe shortage of well-trained technicians who are familiar with the newest technology.

Just as the Model T introduced a revolution in automotive technology, today's computer designed and controlled vehicles are introducing another major advance in auto technology.

Yesterday's skills are no longer sufficient. Join us for training that can make you part of the new "high-tech" automotive world.

Let's get started. Phone us or complete and mail the attached card today to find out how we can help you. No obligation.
